Education

Islamic University of Technology (IUT) — **Aug 2022 – Sep 2026**
Bachelor of Science in Software Engineering (First Class) — Gazipur, Bangladesh

Rajuk Uttara Model College — **2019 – 2021**
Higher Secondary Certificate (HSC) — Dhaka, Bangladesh

Experience

Software Engineering Intern — **Oct 2025 – Feb 2026**
DATA Limited (IT Company of Savoy) — Dhaka, Bangladesh

- Developed full-stack ERP modules using **Laravel**, **Next.js**, and **MySQL**, implementing secure REST APIs, authentication workflows, and business-critical features for inventory, sales, and transaction management.
- Gathered requirements through field visits with product stakeholders and produced SRS documents, database models **(ERD)**, and interactive **Figma** prototypes for ERP modules.
- Integrated backend APIs with frontend components, implemented **role-based access control**, resolved functional issues, and delivered an **MVP** through stakeholder demonstrations and iterative feedback.

Projects

VibeShopping – Full-Stack E-Commerce Platform [Live Demo]

- Built and deployed an e-commerce platform using **Next.js 15**, **TypeScript**, **Prisma**, and **PostgreSQL**, featuring **Auth.js** authentication with role-based access control.
- Integrated a stock-aware AI shopping assistant and a multi-provider checkout system with secure payment processing and order tracking.
- Developed an admin dashboard for product and order management with sales analytics, optimizing application performance using **React Server Components** and granular cache revalidation.

InterviewIQ – AI-Powered Technical Interview Platform [Live Demo]

- Built an AI interview platform using **FastAPI**, **Next.js**, **PostgreSQL**, **Alembic**, **Redis**, and **Celery**, with an asynchronous, idempotent pipeline for resume parsing, job-description gap analysis, question generation, and report generation.
- Designed dual-pass grading that combines **embedding similarity** with **LLM-as-a-Judge** and sends disagreements to recruiter review, plus hybrid **RAG** (**pgvector** + full-text search, RRF) that grounds questions in cited sources.
- Made LLM calls more reliable with caching, circuit breakers, and retries; added token budgets and cost tracking; and shipped the platform with **Docker**, **GitHub Actions** CI, automated tests, and reduced API latency.

Wander Bangladesh – Interactive Travel Experience Platform [Live Demo]

- Developed a modern travel platform using **Next.js 16**, **React 19**, **TypeScript**, and Tailwind CSS.
- Designed a responsive and immersive user experience using reusable components, dynamic routing, optimized media rendering, and smooth scroll-based interactions.

E-Blog – Full-Stack Blogging Platform

- Developed a **MERN** blogging platform with **Clerk** authentication, **RESTful APIs**, CRUD operations, React infinite scroll, and role-based admin content management.

Skills

Languages	C++, Java, JavaScript, Python, TypeScript, PHP
Frameworks	React.js, Next.js, Node.js, Express.js, FastAPI, Laravel, Tailwind CSS
Databases	PostgreSQL, MySQL, MongoDB, Redis
Tools/Libraries	Git, GitHub, GitHub Actions, Docker, Pytest, Vercel, Celery, Prisma, Alembic, Eloquent
Concepts	OOP, SOLID Principles, Design Patterns, REST APIs, WebSocket
AI/LLM	LLM Integration, RAG, Embeddings, LLM-as-a-Judge, Prompt Engineering

Achievements

- Co-first author, **BenHalluEval** (**AACL-IJCNLP 2026**, Main Conference); co-author, LLM evaluation for medical QA (**IEEE ICCIT 2025**).
- Organized **CodeRush Fest**, an inter-university programming contest held at IUT.
- Solved **200+** programming problems on Codeforces and LeetCode.
