## Projects

**E-Blog - Personal Blogging Platform** GitHub
*MongoDB, Express.js, React.js, Node.js, Clerk Auth, Tailwind CSS*

- Built a full-stack blogging platform with user authentication, CRUD operations, and favorite management.
- Implemented Clerk authentication (email, passkey, Google) with protected user and admin routes.
- Developed an admin dashboard for role-based content moderation and management.

**VibeShopping - E-Commerce Platform (In Progress)** GitHub
*Next.js, TypeScript, PostgreSQL, Prisma, ShadCN UI*

- Developing a modern e-commerce platform with product listings, cart management, and admin controls.
- Implementing search, filtering, authentication, and secure payment workflows.
- Built with Next.js 15 and ShadCN UI; continuously deployed on Vercel.

**GadgetMart - Multi-Vendor E-Commerce Platform (Team Project)** GitHub
*MongoDB, Express.js, React.js, Node.js, Tailwind CSS*

- Built a multi-vendor marketplace allowing verified shops to list products and manage orders.
- Enabled secure browsing, searching, and purchasing for customers.
- Implemented role-based authentication and password strength validation.

## Education

**Islamic University of Technology (IUT), OIC** Gazipur, Bangladesh
Bachelor of Science in Software Engineering Aug 2022 – Present
